

EZ FUSION - TAPE FUSION EXTENSIONS

EZ FUSION Extensions are made of the finest quality 100% human hair. They gently add length, volume, & highlights to your hair. Best of all they stay in up to 2-3 months and are reusable up to 4 times. Before the installation, wash your customer's hair with a clarifying shampoo, without using any conditioners. Apply the Extensions on clean, dry hair. Please wait 48 hours after the installation before washing your customer's hair again.

STEP 1 : CREATE A PART AT THE BACK OF THE HEAD

To add LENGTH make a horizontal part 1 1/2" or 3 cm above the hairline at the base of the neck.

STEP 2 : SELECT A 3" (8CM) WIDE PRE-FOLDED EZ FUSION EXTENSION

Select a 3" (8cm) wide EZ Fusion pre-folded extension.

STEP 3 : SELECT A 1.5" (4CM) WIDE SECTION OF YOUR CLIENT'S HAIR

Select a 1.5" (4cm) wide section of your client's hair, below the part, about 1/2" or 1 cm from the left side hairline. Please ensure that section of your client's hair has about the same amount of hair as the EZ Fusion extension.

STEP 4 : PEEL OFF THE BLUE FUSION SHIELD ON BOTTOM SIDE OF THE EZ FUSION EXTENSION

Peel off the blue fusion shield on the bottom side of the EZ Fusion extension. Distribute the 1.5" (4cm) wide section of your client's hair, evenly over the entire bottom surface of the extension.

STEP 5 : PEEL OFF THE BLUE FUSION SHIELD ON TOP SIDE OF THE EXTENSION.

Peel off the blue fusion shield on the top side of the EZ Fusion extension. Evenly fold closed the top side of the extension over the bottom side, so that the 2 sides of the extension are perfectly lined up as one fusion unit.

STEP 6 : SEAL THE EZ FUSION EXTENSION

Run your fingers firmly across the folded extension, from side to side, both front and back to ensure a perfect fusion.

STEP 7 : INSERT A SECOND 3" WIDE PRE-FOLDED EZ FUSION EXTENSION

Insert a second EZ Fusion extension 1/2" apart from the first extension, working from left to right, until the last extension in each row is inserted & placed 1/2" away from the right side hairline.

CREATE ANOTHER PART & REPEAT STEPS 1-7

Create a second parallel horizontal part 1" to 1 1/2" above the first row & repeat steps 1 to 7 above.

SPACING BETWEEN THE EXTENSIONS

The average space between each extension is 1/2" or 1 cm. This will vary depending on total number of extensions per row.

TOTAL NUMBER OF ROWS

The optimal number of rows for lengthening is 5: three rows below the ears, & two above the ears, each 1 1/2" (3cm) apart.

INSTALLATION PATTERN

The EZ Fusion extensions in each row should be inserted in a checkerboard pattern when compared the row beneath it.

TOTAL NUMBER OF EXTENSIONS PER ROW

The average number of extensions per row will vary from 2-3 in the first row, 3-4 in the second row, 3-4 in the third row, & 6-8 in the 4th & 5th rows. The total number of rows will also vary depending on the desired result.

Once completed, you will marvel at the ease of installation & natural appearance of the EZ Fusion Hair Extension System.
